Wireless Keypad

Features:

The Wireless Password Keyboard for GSM Alarm allows totally wireless operation. By successfully matching with the alarm panel, arm/disarm functions for emergency call are realized.

Wireless keyboard integrates RFID card and touch button to achieve immediate control. This device also has advantages of simple operation, stable working performance and long service life.

TECHNICAL SPECIFICATION

Power	DC 5V 1A	**Working Environment**	-20 °C - +55 °C
Standby Current	≤60uA	**Dimension**	141×140×25mm (L×W×H)
Alarm Current	≤50mA	**Humidity**	40-80%
Alarm Sound	≥70dB	**Emission Frequency**	433.92MHz
Wireless emitting distance	250 meters (in the open area)	**Battery**	3.7V/800mAh
Standby time	1 year or so (After the battery is fully charged)
