

M-2RP

Range:
150-200 m with antenna

ROLLING CODE TECHNOLOGY GREEN LED

P-250M-2RP NEW

Two-channel transmitter, rolling code technology, 433,92 MHz.

K-250M-2RPX20 NEW

Pack of 20 two-channel transmitters with rolling code technology, 433.92 MHz.

TECHNICAL DRAWINGS

FEATURES:

- frequency: 433,92 MHz
- range: 150 - 200 m in open air (the effective range depends on terrain and possible radio frequency interferences)
- a transmitter can be programmed into any number of self-learning radio receivers, thus avoiding the use of different transmitters

ROLLING CODE

FEATURES

- 281.000 billion code combinations
- rolling code technology: every time the transmitter sends a code, it generates a new code using an encoder. An algorithm identifies and validates only the signal of the transmitters encoded by the radio receiver

PROS

- virtually impossible to duplicate
- the code can be personalized thanks to the TAUPROG programmer
- ideal for multi-user systems
