

Installation/Wiring Instructions

Sounder with Flasher

Important:

All audible and visual signaling appliances must be installed in accordance with all applicable national and local fire alarm codes and any other required regulatory agency.

Sounder with Flasher adopts a built-in integrated circuit, a piezoelectric sounder and high intensity strobe which when combined, produces a high energy conversion efficiency for effective output of light and sound while utilizing a minimum amount of power.

Technical Specification:

Temp Range	-10°C ~ +50°C
Humidity Range	95% RH
Operating Voltage	24VDC
Working Current	80/120mA
Flash Intensity	1.2WS
Flash Period	1.5S
Audio Alarm	105dB
Life of flash light	40000 TIME
Provenience of sound alarm	Three kinds 1.Ambulance sound 2.Sound of police car 3.Sound of fire engine
Dimensions	134*115*49mm
