|--------------------------------|-----------------------------------------------|
| Model                          | TS-338                                        |
| Polar Pattern                  | Heart-shape                                   |
| Type                           | condenser                                     |
| Frequency                      | 20Hz-18KHz                                    |
| Impedance                      | 150Ω, Balanced                                |
| Sensitivity                    | -40dB±2dB                                     |
| dynamic Range                  | 109dB, 1KH at max spl                         |
| S/N Rate                       | 65dB 1KHz at 1 Pa                             |
| supply Voltage                 | AA battery                                    |
| Switch                         | electronic touch                              |
| Mic Length                     | 410mm                                         |
| Cable Connection               | 8m double corn cables,<br>8.5mm XLR connector |
| Mic Weight                     | 0.78kg                                        |
| Base specifications(W x L x H) | 114 x 140 x 37mm                              |
