

Public Address System

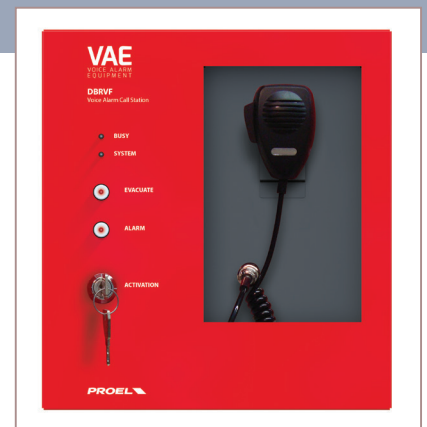

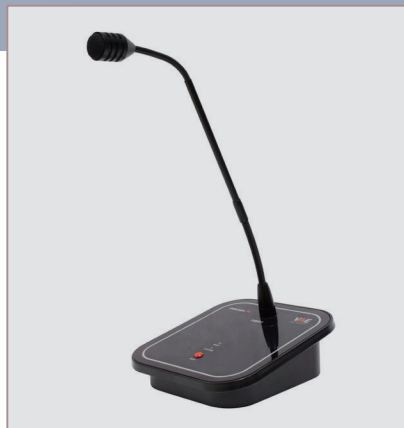

**TELEFIRE**  
Open Fire Detection Systems

**TFVE-300**

# TFVE-300

## Combined Public Address System

- > Combined and modular all-in-one PA system.
- > High-quality 300 W power amplifier with a 100 V output.
- > Includes an active sub-woofer outlet for high-quality background music.
- > Suitable for all types of facilities including exhibition halls, industrial buildings, schools, residential homes.
- > Includes programmable ring clock for playing sounds or music at schools.
- > Includes two optional pre-recorded Hebrew emergency announcements: regarding alarm and evacuation. The announcements include standard alert sounds in accordance with the requirements of the NFPA and UL.
- > Announcements are broadcast by the fire detection control unit, according to pre-programmed scenarios. Using switches at the front of the unit, and the remote emergency microphone.
- > Approved by the Standards Institution of Israel and by the European EN standards.
- > Operated either by a direct connection to the control unit, or by using addressable outlet units ADR-723.
- > Optional remote microphones, controlled and connected.
- > Built-in ETHERNET port for remote communication.

Over 40 years Telefire develops, designs, manufactures, provides consultation and delivers fire detection and extinguishing systems, control systems and computerized alert and indication means.

Telefire is a global leader in fire detection and extinguishing systems. The company develops and manufactures open systems that interface with a variety of control systems and combine development with application of novel technology.
